Loading and Unloading Systems for Freeze Dryers are designed to increase the efficiency and convenience of freeze dryers. Using this system, operators place the items to be processed on special trays and then push the trays into the freeze dryer. The system can also automatically move and rotate pallets as needed to ensure items are evenly exposed to cooling and heating zones. Loading and Unloading Systems for Freeze Dryers can also help to quickly and safely unload processed dry items after the freeze-drying process is complete. They remove trays from the freeze dryer and place dry items into sealed containers that keep them dry. Such a system can significantly reduce operator workload, shorten operation time, and increase productivity.
