The global Locking Clamping Pins market size is predicted to grow from US\$ 24.81 million in 2025 to US\$ 29.38 million in 2032; it is expected to grow at a CAGR of 2.5% from 2026 to 2032.

Locking Clamping Pins are similar to standard Clamping Pins, except that the pin body is positively retained in a locking bushing. In fully retracted position, the bushing's spring clip snaps into the pin's radial groove. This holds the pin fully retracted by spring force and positively prevents removal. Spring pressure also holds the pin in intermediate extended positions, an advantage especially if the fixture is turned upside down.

According to our "Construction Machinery" research center, sales of construction machinery in Europe increased by 24% in 2021, and in 2022 the construction machinery revenue in Europe was about US\$ 22 billion, while the US market sold about \$36 billion in construction machinery in 2022.
