Abstracts

The global Long-acting Anti-HIV Drugs market size is predicted to grow from US\$ 295 million in 2025 to US\$ 815 million in 2032; it is expected to grow at a CAGR of 15.8% from 2026 to 2032.

Long-acting anti-HIV drugs are antiretroviral products formulated with extended-release technologies to maintain therapeutic drug exposure over prolonged intervals, enabling HIV treatment (ART) or prevention (PrEP) to be delivered weekly, monthly, or even less frequently rather than requiring daily oral dosing. They are designed to address real-world adherence and stigma-related barriers: durable viral suppression depends on consistent medication intake, yet missed doses, treatment fatigue, irregular routines, and privacy concerns can undermine outcomes and increase transmission risk; long-acting dosing reduces pill burden and the day-to-day “reminder” of therapy, improving continuity of care and quality of life while expanding prevention options for people who struggle with daily PrEP. Historically, HIV care progressed from early multi-pill oral regimens toward potent combination therapies with better safety and resistance profiles, after which innovation increasingly focused on delivery and adherence; advances in formulation science and drug-delivery platforms enabled extended-release approaches such as intramuscular or subcutaneous injections and implants, using technologies like nanosuspensions, microspheres, lipid/polymer carriers, or controlled-release matrices to provide predictable exposure over time. The upstream supply chain typically spans active pharmaceutical ingredients and key intermediates (specialty chemicals, chiral reagents, solvents, catalysts), formulation excipients (biodegradable polymers such as PLGA, lipids, surfactants, stabilizers, and release-controlling matrices), and sterile delivery/packaging inputs (prefilled syringes and needle components, rubber stoppers and seals, sterile filters, glass or high-barrier polymer containers), along with critical manufacturing and quality-control “components” (single-use fluid paths, pumps/valves,

isolator and HEPA filtration elements, in-line sensors for particle size/viscosity, cold-chain temperature indicators). Because long-acting products place tighter constraints on sterility assurance, particle-size distribution, release-profile consistency, and storage stability, upstream material quality systems and regulatory-grade traceability are often decisive for batch release and reliable commercial supply. In 2025, global production capacity for long-acting anti-HIV drugs reached 150,000 doses, while sales totaled 130,200 doses. The average selling price was approximately USD 2,312 per dose, and gross margins across manufacturers were in the range of 60%–70%.

In the current market landscape, long-acting anti-HIV therapy and prevention are moving from “clinically feasible” to “real-world deployable,” with commercialization increasingly shaped by adherence outcomes, service accessibility, and reimbursement pathways rather than efficacy alone. In practice, adoption tends to concentrate in populations where daily dosing is challenging due to unstable routines, pill fatigue, or privacy concerns, while broader rollout depends heavily on care delivery readiness—standardized visit scheduling, repeatable injection workflows, cold-chain and inventory control, and robust management of adverse events and the so-called pharmacokinetic “tail.” As clinicians and patients gain experience, conversations are shifting from whether long-acting options work to who benefits most, how to switch safely, and how to sustain therapy over time, with stronger integration into sexual health clinics, community programs, and public health initiatives—making “drug plus service” the de facto product.

Looking ahead, innovation is likely to track toward longer dosing intervals, more stable exposure, higher resistance barriers, simpler administration, and a better patient experience, supported by multiple delivery platforms in parallel. On the regimen side, development momentum favors combinations and strategies that maintain a strong barrier to resistance and reduce vulnerability during transitions or missed visits. On the formulation side, continued optimization of nanosuspensions, microspheres, lipid/polymer carriers, and implants aims to improve injection volume, local tolerability, release predictability, and storage/transport stability. On the system side, care models will diversify beyond conventional clinic injections, pairing long-acting dosing with telehealth follow-up, community-based administration, mobile care teams, and digital tools for appointment and adherence management, creating delivery pathways that better match local resource constraints. In prevention settings, long-acting options may enable more sustainable coverage for higher-risk groups by reducing discontinuation and improving continuity of protection.

The market is propelled and constrained by forces that operate simultaneously. Key

drivers include public health priorities around sustained suppression and sustained prevention, patient demand for improved quality of life and discretion, and payer interest in avoiding lapses that lead to complications and onward transmission; on the industry side, maturation of formulation platforms, sterile manufacturing capabilities, and increasingly standardized service delivery all support uptake. Major barriers include access limitations inherent to facility-based administration, operational burdens from cold-chain and inventory requirements, management of injection-site reactions and long-term tolerability, and the resistance and transmission risks associated with interruption during the drug “tail,” which necessitate disciplined screening, follow-up, and contingency plans. Regional variation in regulation, procurement, and reimbursement can further slow penetration, while stigma, information gaps, and suboptimal service experiences may undermine persistence. As a result, competitive advantage will increasingly hinge not only on the molecule, but on end-to-end capabilities across screening, dosing, follow-up, supply assurance, and risk management.

LP Information, Inc. (LPI) ' newest research report, the “Long-acting Anti-HIV Drugs Industry Forecast” looks at past sales and reviews total world Long-acting Anti-HIV Drugs sales in 2025, providing a comprehensive analysis by region and market sector of projected Long-acting Anti-HIV Drugs sales for 2026 through 2032. With Long-acting Anti-HIV Drugs sales broken down by region, market sector and sub-sector, this report provides a detailed analysis in US\$ millions of the world Long-acting Anti-HIV Drugs industry.

This Insight Report provides a comprehensive analysis of the global Long-acting Anti-HIV Drugs landscape and highlights key trends related to product segmentation, company formation, revenue, and market share, latest development, and M&A activity. This report also analyzes the strategies of leading global companies with a focus on Long-acting Anti-HIV Drugs portfolios and capabilities, market entry strategies, market positions, and geographic footprints, to better understand these firms' unique position in an accelerating global Long-acting Anti-HIV Drugs market.

This Insight Report evaluates the key market trends, drivers, and affecting factors shaping the global outlook for Long-acting Anti-HIV Drugs and breaks down the forecast by Type, by Application, geography, and market size to highlight emerging pockets of opportunity. With a transparent methodology based on hundreds of bottom-up qualitative and quantitative market inputs, this study forecast offers a highly nuanced view of the current state and future trajectory in the global Long-acting Anti-HIV Drugs.

This report presents a comprehensive overview, market shares, and growth

opportunities of Long-acting Anti-HIV Drugs market by product type, application, key manufacturers and key regions and countries.

Segmentation by Type:

Single Drug

Combination Preparation

Segmentation by Dosing Interval:

Short-interval Injections

Monthly Injections

Quarterly Injections

Segmentation by Drug Properties:

Original Drug

Generic Drug

Segmentation by Application:

Hospital

Clinic

Other

This report also splits the market by region:

Americas

United States

Canada

Mexico

Brazil

APAC

China

Japan

Korea

Southeast Asia

India

Australia

Europe

Germany

France

UK

Italy

Russia

Middle East & Africa

Egypt

South Africa

Israel

Turkey

GCC Countries

The below companies that are profiled have been selected based on inputs gathered from primary experts and analysing the company's coverage, product portfolio, its market penetration.

ViiV Healthcare

Janssen Pharmaceuticals

Gilead Sciences

Theratechnologies

Key Questions Addressed in this Report

What is the 10-year outlook for the global Long-acting Anti-HIV Drugs market?

What factors are driving Long-acting Anti-HIV Drugs market growth, globally and by region?

Which technologies are poised for the fastest growth by market and region?

How do Long-acting Anti-HIV Drugs market opportunities vary by end market size?

How does Long-acting Anti-HIV Drugs break out by Type, by Application?

Contents

1 SCOPE OF THE REPORT

- 1.1 Market Introduction
- 1.2 Years Considered
- 1.3 Research Objectives
- 1.4 Market Research Methodology
- 1.5 Research Process and Data Source
- 1.6 Economic Indicators
- 1.7 Currency Considered
- 1.8 Market Estimation Caveats

2 EXECUTIVE SUMMARY

2.1 World Market Overview

- 2.1.1 Global Long-acting Anti-HIV Drugs Annual Sales 2021-2032

- 2.1.2 World Current & Future Analysis for Long-acting Anti-HIV Drugs by Geographic Region, 2021, 2025 & 2032

- 2.1.3 World Current & Future Analysis for Long-acting Anti-HIV Drugs by Country/Region, 2021, 2025 & 2032

2.2 Long-acting Anti-HIV Drugs Segment by Type

- 2.2.1 Single Drug

- 2.2.2 Combination Preparation

- 2.2.3 Long-acting Anti-HIV Drugs Sales by Type

- 2.2.3.1 Global Long-acting Anti-HIV Drugs Sales Market Share by Type (2021-2026)

- 2.2.3.2 Global Long-acting Anti-HIV Drugs Revenue and Market Share by Type (2021-2026)

- 2.2.3.3 Global Long-acting Anti-HIV Drugs Sale Price by Type (2021-2026)

2.3 Long-acting Anti-HIV Drugs Segment by Dosing Interval

- 2.3.1 Short-interval Injections

- 2.3.2 Monthly Injections

- 2.3.3 Quarterly Injections

- 2.3.4 Long-acting Anti-HIV Drugs Sales by Dosing Interval

- 2.3.4.1 Global Long-acting Anti-HIV Drugs Sales Market Share by Dosing Interval (2021-2026)

- 2.3.4.2 Global Long-acting Anti-HIV Drugs Revenue and Market Share by Dosing Interval (2021-2026)

- 2.3.4.3 Global Long-acting Anti-HIV Drugs Sale Price by Dosing Interval (2021-2026)

2.4 Long-acting Anti-HIV Drugs Segment by Drug Properties

2.4.1 Original Drug

2.4.2 Generic Drug

2.4.3 Long-acting Anti-HIV Drugs Sales by Drug Properties

2.4.3.1 Global Long-acting Anti-HIV Drugs Sales Market Share by Drug Properties (2021-2026)

2.4.3.2 Global Long-acting Anti-HIV Drugs Revenue and Market Share by Drug Properties (2021-2026)

2.4.3.3 Global Long-acting Anti-HIV Drugs Sale Price by Drug Properties (2021-2026)

2.5 Long-acting Anti-HIV Drugs Segment by Application

2.5.1 Hospital

2.5.2 Clinic

2.5.3 Other

2.5.4 Long-acting Anti-HIV Drugs Sales by Application

2.5.4.1 Global Long-acting Anti-HIV Drugs Sale Market Share by Application (2021-2026)

2.5.4.2 Global Long-acting Anti-HIV Drugs Revenue and Market Share by Application (2021-2026)

2.5.4.3 Global Long-acting Anti-HIV Drugs Sale Price by Application (2021-2026)

3 GLOBAL BY COMPANY

3.1 Global Long-acting Anti-HIV Drugs Breakdown Data by Company

3.1.1 Global Long-acting Anti-HIV Drugs Annual Sales by Company (2021-2026)

3.1.2 Global Long-acting Anti-HIV Drugs Sales Market Share by Company (2021-2026)

3.2 Global Long-acting Anti-HIV Drugs Annual Revenue by Company (2021-2026)

3.2.1 Global Long-acting Anti-HIV Drugs Revenue by Company (2021-2026)

3.2.2 Global Long-acting Anti-HIV Drugs Revenue Market Share by Company (2021-2026)

3.3 Global Long-acting Anti-HIV Drugs Sale Price by Company

3.4 Key Manufacturers Long-acting Anti-HIV Drugs Producing Area Distribution, Sales Area, Product Type

3.4.1 Key Manufacturers Long-acting Anti-HIV Drugs Product Location Distribution

3.4.2 Players Long-acting Anti-HIV Drugs Products Offered

3.5 Market Concentration Rate Analysis

3.5.1 Competition Landscape Analysis

3.5.2 Concentration Ratio (CR3, CR5 and CR10) & (2024-2026)

3.6 New Products and Potential Entrants

3.7 Market M&A Activity & Strategy

4 WORLD HISTORIC REVIEW FOR LONG-ACTING ANTI-HIV DRUGS BY GEOGRAPHIC REGION

4.1 World Historic Long-acting Anti-HIV Drugs Market Size by Geographic Region (2021-2026)

4.1.1 Global Long-acting Anti-HIV Drugs Annual Sales by Geographic Region (2021-2026)

4.1.2 Global Long-acting Anti-HIV Drugs Annual Revenue by Geographic Region (2021-2026)

4.2 World Historic Long-acting Anti-HIV Drugs Market Size by Country/Region (2021-2026)

4.2.1 Global Long-acting Anti-HIV Drugs Annual Sales by Country/Region (2021-2026)

4.2.2 Global Long-acting Anti-HIV Drugs Annual Revenue by Country/Region (2021-2026)

4.3 Americas Long-acting Anti-HIV Drugs Sales Growth

4.4 APAC Long-acting Anti-HIV Drugs Sales Growth

4.5 Europe Long-acting Anti-HIV Drugs Sales Growth

4.6 Middle East & Africa Long-acting Anti-HIV Drugs Sales Growth

5 AMERICAS

5.1 Americas Long-acting Anti-HIV Drugs Sales by Country

5.1.1 Americas Long-acting Anti-HIV Drugs Sales by Country (2021-2026)

5.1.2 Americas Long-acting Anti-HIV Drugs Revenue by Country (2021-2026)

5.2 Americas Long-acting Anti-HIV Drugs Sales by Type (2021-2026)

5.3 Americas Long-acting Anti-HIV Drugs Sales by Application (2021-2026)

5.4 United States

5.5 Canada

5.6 Mexico

5.7 Brazil

6 APAC

6.1 APAC Long-acting Anti-HIV Drugs Sales by Region

6.1.1 APAC Long-acting Anti-HIV Drugs Sales by Region (2021-2026)

6.1.2 APAC Long-acting Anti-HIV Drugs Revenue by Region (2021-2026)

6.2 APAC Long-acting Anti-HIV Drugs Sales by Type (2021-2026)

6.3 APAC Long-acting Anti-HIV Drugs Sales by Application (2021-2026)

6.4 China

6.5 Japan

6.6 South Korea

6.7 Southeast Asia

6.8 India

6.9 Australia

6.10 China Taiwan

7 EUROPE

7.1 Europe Long-acting Anti-HIV Drugs by Country

7.1.1 Europe Long-acting Anti-HIV Drugs Sales by Country (2021-2026)

7.1.2 Europe Long-acting Anti-HIV Drugs Revenue by Country (2021-2026)

7.2 Europe Long-acting Anti-HIV Drugs Sales by Type (2021-2026)

7.3 Europe Long-acting Anti-HIV Drugs Sales by Application (2021-2026)

7.4 Germany

7.5 France

7.6 UK

7.7 Italy

7.8 Russia

8 MIDDLE EAST & AFRICA

8.1 Middle East & Africa Long-acting Anti-HIV Drugs by Country

8.1.1 Middle East & Africa Long-acting Anti-HIV Drugs Sales by Country (2021-2026)

8.1.2 Middle East & Africa Long-acting Anti-HIV Drugs Revenue by Country (2021-2026)

8.2 Middle East & Africa Long-acting Anti-HIV Drugs Sales by Type (2021-2026)

8.3 Middle East & Africa Long-acting Anti-HIV Drugs Sales by Application (2021-2026)

8.4 Egypt

8.5 South Africa

8.6 Israel

8.7 Turkey

8.8 GCC Countries

9 MARKET DRIVERS, CHALLENGES AND TRENDS

9.1 Market Drivers & Growth Opportunities

9.2 Market Challenges & Risks

9.3 Industry Trends

10 MANUFACTURING COST STRUCTURE ANALYSIS

10.1 Raw Material and Suppliers

10.2 Manufacturing Cost Structure Analysis of Long-acting Anti-HIV Drugs

10.3 Manufacturing Process Analysis of Long-acting Anti-HIV Drugs

10.4 Industry Chain Structure of Long-acting Anti-HIV Drugs

11 MARKETING, DISTRIBUTORS AND CUSTOMER

11.1 Sales Channel

11.1.1 Direct Channels

11.1.2 Indirect Channels

11.2 Long-acting Anti-HIV Drugs Distributors

11.3 Long-acting Anti-HIV Drugs Customer

12 WORLD FORECAST REVIEW FOR LONG-ACTING ANTI-HIV DRUGS BY GEOGRAPHIC REGION

12.1 Global Long-acting Anti-HIV Drugs Market Size Forecast by Region

12.1.1 Global Long-acting Anti-HIV Drugs Forecast by Region (2027-2032)

12.1.2 Global Long-acting Anti-HIV Drugs Annual Revenue Forecast by Region (2027-2032)

12.2 Americas Forecast by Country (2027-2032)

12.3 APAC Forecast by Region (2027-2032)

12.4 Europe Forecast by Country (2027-2032)

12.5 Middle East & Africa Forecast by Country (2027-2032)

12.6 Global Long-acting Anti-HIV Drugs Forecast by Type (2027-2032)

12.7 Global Long-acting Anti-HIV Drugs Forecast by Application (2027-2032)

13 KEY PLAYERS ANALYSIS

13.1 ViiV Healthcare

13.1.1 ViiV Healthcare Company Information

13.1.2 ViiV Healthcare Long-acting Anti-HIV Drugs Product Portfolios and Specifications

13.1.3 ViiV Healthcare Long-acting Anti-HIV Drugs Sales, Revenue, Price and Gross

Margin (2021-2026)

13.1.4 ViiV Healthcare Main Business Overview

13.1.5 ViiV Healthcare Latest Developments

13.2 Janssen Pharmaceuticals

13.2.1 Janssen Pharmaceuticals Company Information

13.2.2 Janssen Pharmaceuticals Long-acting Anti-HIV Drugs Product Portfolios and Specifications

13.2.3 Janssen Pharmaceuticals Long-acting Anti-HIV Drugs Sales, Revenue, Price and Gross Margin (2021-2026)

13.2.4 Janssen Pharmaceuticals Main Business Overview

13.2.5 Janssen Pharmaceuticals Latest Developments

13.3 Gilead Sciences

13.3.1 Gilead Sciences Company Information

13.3.2 Gilead Sciences Long-acting Anti-HIV Drugs Product Portfolios and Specifications

13.3.3 Gilead Sciences Long-acting Anti-HIV Drugs Sales, Revenue, Price and Gross Margin (2021-2026)

13.3.4 Gilead Sciences Main Business Overview

13.3.5 Gilead Sciences Latest Developments

13.4 Theratechnologies

13.4.1 Theratechnologies Company Information

13.4.2 Theratechnologies Long-acting Anti-HIV Drugs Product Portfolios and Specifications

13.4.3 Theratechnologies Long-acting Anti-HIV Drugs Sales, Revenue, Price and Gross Margin (2021-2026)

13.4.4 Theratechnologies Main Business Overview

13.4.5 Theratechnologies Latest Developments
