Long bag pulse jet dust collector is a high-efficiency bag dust removal equipment, which adopts long filter bag design and pulse jet cleaning technology to remove dust from industrial flue gas. Its working principle is to use dust-containing gas to pass through the filter bag, and the dust is trapped on the surface of the filter bag. Pulse compressed air is sprayed regularly to make the accumulated dust fall off and enter the ash hopper. Due to the long filter bag structure, the equipment has the characteristics of large filtration area, good cleaning effect, low operating resistance, and long maintenance cycle. It is widely used in flue gas dust removal and environmental management in industries such as steel, cement, electricity, chemical industry, and waste incineration.
