Long-range Laser Obstacle Remover for Power Grid is an intelligent device that uses high-energy laser beams to achieve non-contact, long-distance removal of foreign objects from power transmission lines. It is mainly used in the field of power system operation and maintenance. It emits a laser beam of a specific wavelength and accurately focuses on the target foreign object (such as kite lines, plastic films, branches and other non-metallic materials), causing it to melt or gasify and fall off due to heat, thereby ensuring the safe operation of the power grid.
