These systems can be used for multiple purposes and are suitable for use in warehouses, retail shops and garage shelving.

These are similar to pallet racking systems in the way that they are built but the main difference is that these can only be used to store light and medium sized products while pallet racking is used for a wider range of products, from lightweight to heavy duty materials. However, the main point that sways the balance in favour of long span shelving is that they are cheaper than pallet racking systems and act as an alternative for retailers who do not have the floor space and the budget to afford pallet racking systems.
