Loop Resistance Tester is a special instrument for measuring the contact resistance and circuit resistance of switch control equipment. The test current adopts the 100A DC recommended by the national standard GB763. The circuit resistance or contact resistance can be directly measured in the case of 100A, 200A, 300A, 400A, 500A or 600A current, and is directly displayed. It can also be saved to the instrument, the maximum number of groups is 100, the saved data can be communicated with the upper computer through the RS232 interface, the data can be uploaded to the computer for saving or printing. The instrument is accurate in measurement and stable in performance. It is suitable for field maintenance of high voltage switch in power supply department and circuit resistance test in high voltage switch factory.
