United States market for Low Earth Orbit Communication Satellite is estimated to increase from US\$ million in 2022 to US\$ million by 2029, at a CAGR of % from 2023 through 2029.

China market for Low Earth Orbit Communication Satellite is estimated to increase from US\$ million in 2022 to US\$ million by 2029, at a CAGR of % from 2023 through 2029.

Europe market for Low Earth Orbit Communication Satellite is estimated to increase from US\$ million in 2022 to US\$ million by 2029, at a CAGR of % from 2023 through 2029.

Global key Low Earth Orbit Communication Satellite players cover SpaceX, Thales Alenia Space, OneWeb Satellites, Lockheed Martin, Boeing, Planet Labs, Northrop Grumman, ISS-Reshetnev and Kepler Communications, etc. In terms of revenue, the global two largest companies occupied for a share nearly % in 2022.

According to the height of the satellite orbit, communication satellites can be divided into low-orbit communication satellites (LEO), medium-orbit communication satellites (MEO) and high-orbit geosynchronous communication satellites (GEO). The orbit height of LEO satellites is 500km~2000km. The advantage of low orbit is that on the one hand, the

orbit height of the satellite is low, which makes the transmission delay short and the path loss is small. The constellation composed of multiple satellites can achieve true global coverage and frequency reuse. More effective; on the other hand, technologies such as cellular communication, multiple access, spot beam, and frequency multiplexing also provide technical support for low-orbit satellite mobile communications. Therefore, the LEO system is considered to be one of the most promising satellite mobile communication technologies.
