## Abstracts

The global Low Melt Polyester Fiber market size is predicted to grow from US\$ 2920 million in 2025 to US\$ 4852 million in 2031; it is expected to grow at a CAGR of 8.8% from 2025 to 2031.

Low Melt Polyester Fiber is a type of synthetic fiber engineered to have a lower melting point compared to conventional polyester fibers. Typically composed of a copolyester (Co-PET) or modified polyester blend, Low Melt Polyester Fiber has a melting range between 110°C and 200°C. This unique property enables it to function as a thermal adhesive, allowing fiber bonding through heat without the need for chemical adhesives or binders.

Low Melt Polyester Fiber is primarily utilized in composite materials, nonwoven fabrics, and technical textiles to enhance mechanical strength, durability, and resilience. By melting at relatively low temperatures, it forms strong inter-fiber bonds, improving structural integrity while maintaining flexibility and softness. This makes it an ideal component in various applications such as automotive interiors, mattresses, insulation materials, and industrial textiles.

The global market for Low Melt Polyester Fiber has seen significant growth over the past decade due to increasing demand for high-performance nonwoven materials. Low Melt Polyester Fiber is widely used in industries that require strong thermal bonding solutions, and its eco-friendly properties have driven its adoption in sustainable applications.

Several factors have contributed to the expanding Low Melt Polyester Fiber market:

**Rise in Automotive Production:** The demand for lightweight and durable automotive interior materials has fueled the growth of Low Melt Polyester Fiber in vehicle manufacturing.

**Sustainability and Eco-Friendly Materials:** Many industries are shifting towards sustainable production methods, reducing reliance on chemical adhesives by using Low Melt Polyester Fiber as a thermal bonding agent.

**Technological Advancements:** Continuous innovation in fiber engineering has led to improved Low Melt Polyester Fiber variants with better adhesion, strength, and recyclability.

**Growth in the Nonwoven Industry:** The increasing use of nonwoven fabrics in various sectors, including healthcare and filtration, is boosting the demand for Low Melt Polyester Fiber.

Low Melt Polyester Fiber manufacturers include Huvis, Toray Chemical Korea, Nan Ya Plastics, ECER, etc. The top 3 companies hold a share more than 40%. China takes up the largest production market, with a share more than 50%, followed by South Korea with the share about 35%.
