According to our LPI (LP Information) latest study, the global Low Profile Additive (LPA) market size was valued at US\$ 506.7 million in 2023. With growing demand in downstream market, the Low Profile Additive (LPA) is forecast to a readjusted size of US\$ 958.4 million by 2030 with a CAGR of 9.5% during review period.

The research report highlights the growth potential of the global Low Profile Additive (LPA) market. Low Profile Additive (LPA) are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Low Profile Additive (LPA). Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Low Profile Additive (LPA) market.

Asia-Pacific dominated the global low profile additive (LPA) market, with the largest consumption from China and Japan.

The market for low profile additive (LPA) is expected to register a CAGR of more than 7%, during the forecast period of 2019-2024. Major factors driving the market studied are the rising demand for high-performance SMC (Sheet Molding Compound) formulations from the automotive industry, and emerging applications in fiber-reinforced plastics (FRP). However, high polymerization shrinkage of unsaturated polyester resin with the crosslinking styrene monomer is expected to hinder the market growth.
