Low Profile DIN Rail Power Supplies are compact power modules designed for industrial automation control panels, characterized by their minimal height (typically 40mm) for efficient space utilization on standard DIN rails (35mm). These units convert AC power (100-240V) to regulated DC outputs (12/24/48V) to supply PLCs, sensors, and relays, featuring industrial-grade protections (overload, short-circuit) and wide input voltage ranges (85-264VAC). The slim profile maximizes cabinet space efficiency, ideal for distributed I/O systems or high-density installations. Advanced models may offer fanless cooling (convection-based) and high-temperature operation (-25°C to +70°C), ensuring reliability in harsh environments.
