Low-smoke silicone foam is a functional foam material made from silicone rubber as the base material, using a low-smoke, flame-retardant, and environmentally friendly formula. It produces very little smoke under combustion or high-temperature conditions and possesses resistance to high and low temperatures, elasticity, and sealing and cushioning properties, making it suitable for applications with high safety requirements.

Upstream industries include silicone rubber raw materials, low-smoke flame-retardant systems, foaming agents, environmentally friendly additives, and formulation additives; downstream applications are mainly in rail transportation, aerospace, building fire protection, electronics and electrical equipment, new energy equipment, and high-end industrial sealing and protection. The global price of low-smoke silicone foam is \$11,134 per ton, with annual sales of approximately 212,800 tons and a global annual production capacity of approximately 240,000 tons, resulting in an industry profit margin of 25%.
