Semi-static ropes are ideal for use in caves, with their low stretch perfect for SRT.

In rock climbing and caving, ropes are a major part. Climbing ropes are connected via splices, secured to a wall or rock, and attached to the climber. The global market is rapidly expanding owing to the use of climbing ropes in gyms, increase in outdoor sports, and rock climbing and caving as a sporting activity. The rising awareness about the health benefits of rock climbing ropes is one of the good reasons for increasing the demand for rock climbing ropes. The increase in tourism activities mainly accelerates market demand.
