The global Low-Temperature Vaccine Cold Chain Box market size is predicted to grow from US\$ 136 million in 2025 to US\$ 226 million in 2032; it is expected to grow at a CAGR of 7.7% from 2026 to 2032.

A Low-Temperature Vaccine Cold Chain Box is a specialized temperature-controlled transport container designed to maintain vaccines within specified low-temperature conditions during storage, transportation, and distribution. It typically consists of a durable outer casing, thermal insulation, a vaccine payload compartment, and cooling media such as ice packs, phase-change materials (PCMs), gel refrigerants, or dry ice. By minimizing heat transfer and using stored cooling capacity, the box maintains the required vaccine temperature without continuous external power. Depending on vaccine storage requirements, these products can support conventional 2–8°C refrigerated conditions, frozen temperatures, and dry-ice-based ultra-low-temperature transportation. They are mainly used for vaccine distribution between manufacturers, public health agencies, hospitals, vaccination sites, and pharmaceutical cold-chain logistics providers. In this report, Low-Temperature Vaccine Cold Chain Boxes primarily refer to passive vaccine cold boxes and vaccine transport containers, excluding powered vaccine refrigerators, freezers, refrigerated vehicles, and cold rooms. In 2025, global sales volume for low-temperature vaccine cold chain boxes reached 780,000 units, with an average selling price of \$178 per unit and an industry average gross margin ranging from 30% to 38%. The value chain starts with upstream raw materials including HDPE/LLDPE, PP/EPP/EPS engineering plastics, polyurethane foam, vacuum insulation panels (VIPs), phase-change materials (PCMs), gel and water-ice-pack materials, and aluminum-foil composite films, followed by container design, molding/foaming, insulation-system integration, thermal qualification and final assembly, with downstream demand coming primarily from vaccine manufacturers, government

and public-health immunization agencies, hospitals and vaccination centers, and specialist pharmaceutical cold-chain logistics providers.

United States market for Low-Temperature Vaccine Cold Chain Box is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Low-Temperature Vaccine Cold Chain Box is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Low-Temperature Vaccine Cold Chain Box is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
