Low tunnel plastic film is a type of plastic film that is used to create low tunnels in gardening and agriculture. These tunnels are typically made by bending hoops or stakes over a row of plants and covering them with the plastic film to create a protective barrier. The film helps to trap heat and moisture, creating a warmer and more humid environment for the plants to grow in. It can also protect plants from pests, wind, and harsh weather conditions.

The global Low Tunnel Plastic Film market size is projected to grow from US\$ million in 2024 to US\$ million in 2030; it is expected to grow at a CAGR of %from 2024 to 2030.
