Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

LPDDR DRAM provides a high-performance solution with significantly reduced power consumption, which is a key requirement for mobile applications such as tablets, smartphones, and automobiles. The SoC required for such applications tends to use fewer storage devices and shorter interconnections on each channel, and LPDDR DRAM runs faster than standard DDR DRAM (for example, LPDDR4/4X DRAM runs at a maximum speed of 4267 Mbps, while the operating speed of standard DDR4 DRAM is up to 3200 Mbps), so it can provide higher performance. However, LPDDR DRAM is not used in such devices. When in standby, they can be placed in a low-power state, such as a deep sleep state, or they can be operated at a lower frequency using the dynamic frequency scaling (DFS) function. Therefore, when the storage channel is on standby, the storage controller can use these low power consumption functions promptly to reduce the total power consumption.

The global market for LPDDR DRAM is estimated to increase from US\$ million in 2021 to reach US\$ million by 2028, exhibiting a CAGR of % during 2022-2028. Keeping in mind the uncertainties of COVID-19 and Russia-Ukraine War, we are continuously tracking and evaluating the direct as well as the indirect influence of the pandemic on different end use sectors. These insights are included in the report as a major market contributor.

The APAC LPDDR DRAM market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The United States LPDDR DRAM market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The Europe LPDDR DRAM market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

The China LPDDR DRAM market is expected at value of US\$ million in 2022 and grow at approximately % CAGR during 2022 and 2028.

Global key LPDDR DRAM players cover Samsung, SK Hynix, Micron Technology, Nanya Technology and Winbond, etc. In terms of revenue, the global largest two companies occupy a share nearly % in 2021.
