Lure bait, used in lure fishing (also known as "luya" fishing, where anglers cast from the shore, docks, or boats), refers to artificial bait made from synthetic materials. These bait imitate real fish or other aquatic organisms, aiming to attract and entice the target fish to bite the hook. The design and appearance of lure bait typically vary depending on the species of fish targeted and the fishing environment, all with the goal of increasing the chances of successful catches.

Luya Fake Bait has emerged as an innovative product in the fishing industry in recent years. With advancements in angling techniques and the pursuit of more efficient and challenging fishing experiences by enthusiasts, the fake bait market is rapidly gaining popularity. These artificial baits, known for their lifelike appearance and mimicry of real fish and aquatic creatures, have become the top choice for fishing enthusiasts. Whether in freshwater or saltwater, these baits effectively attract a variety of fish species, including bass, snapper, and giant lingcod. Their success can be attributed to advanced materials and manufacturing techniques, giving them outstanding durability and realistic swimming actions.
