The LVLP (Low Volume Low Pressure) pressure feed spray gun is a type of paint spray gun that is designed to use less air and less paint than traditional high volume, high pressure (HVLP) spray guns. This makes it an ideal choice for spraying smaller areas or for use in tight spaces where overspray can be a potential hazard. The pressure feed design of the LVLP spray gun is particularly useful for spraying heavy materials like primer or gel coat. It features a large, pressurized paint cup that delivers consistent and

efficient paint flow to the nozzle. The LVLP pressure feed spray gun is a popular choice for automotive, marine, and woodworking applications.
