The global Machine Tool Electrical Control System market size is projected to grow from US\$ million in 2022 to US\$ million in 2029; it is expected to grow at a CAGR of % from 2023 to 2029.

With the development of science and technology, new requirements are constantly put forward for the production process, and the electrical control devices of machine tools are also constantly updated. From manual control to automatic control in control method; from simple to complex in control function; from cumbersome to light in operation; from single contact hard-wired relay control system to microprocessor-based in control principle Central software control system. The emergence of new control theory and new electrical and electronic devices has continuously promoted the development of machine tool electrical control technology.

The electrical control system of machine tools is generally composed of three systems, namely feedback detection system, NC control system and servo drive system. The electrical control system of CNC machine tools will have different degrees and influences on the processing of CNC machine tools. From the perspective of the machining accuracy of CNC machine tools, the position servo control system can have a great influence on the machining accuracy of the machine tool. Therefore, position accuracy is one of the more important indicators. In order to maintain the accuracy of the position accuracy, it is not only necessary to select the correct open-loop amplification multiple when the system is used, but also to have certain accuracy requirements for the components in the position detection. In addition, since the CNC machine tool is an automated equipment with high precision and high efficiency, it can

provide higher production efficiency for the production of CNC machine tools, but if there are problems and major failures in this system, the resulting The loss is also immeasurable. Therefore, the reliability and safety of the electrical control system of CNC machine tools is also an aspect worthy of attention.
