The global Magnesium Raw Materials (Magnesite) market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

The impact of the latest U.S. tariff measures and the corresponding policy responses from countries worldwide on market competitiveness, regional economic performance, and supply chain configurations will be comprehensively evaluated in this report.

The driving factors for magnesium raw materials, specifically magnesite, include:

1. **Magnesium production:** Magnesite is a primary source of magnesium, one of the most important industrial metals. Magnesium is used in various industries, including automotive, aerospace, construction, and electronics, driving the demand for magnesite as a raw material.
2. **Refractory and steel industry:** Magnesite is widely used in the production of refractories, which are materials that can withstand high temperatures and harsh conditions. Refractories made from magnesite help line and protect furnaces, kilns, and other high-temperature equipment in industries such as steelmaking, cement production, and glass manufacturing.
3. **Environmental applications:** Magnesite plays a role in environmental applications, particularly in flue gas desulfurization (FGD) systems. Magnesite-based materials, such as magnesium oxide, are used to remove sulfur dioxide (SO₂) from flue gases emitted by power plants and industrial facilities, reducing harmful emissions and addressing air pollution concerns.

4. Agricultural applications: Magnesite is used as an agricultural fertilizer to supply magnesium and correct magnesium deficiency in the soil. It helps improve plant growth, nutrient uptake, and overall crop quality, making it a valuable input for agricultural production.

5. Chemical industry: Magnesite is a source of magnesium compounds, including magnesium oxide (MgO), which finds applications in the chemical industry. MgO is used in the production of flame retardants, magnesium salts, catalysts, and various chemical processes.
