The global Magnetic Detacher market size is predicted to grow from US\$ 137 million in 2025 to US\$ 200 million in 2032; it is expected to grow at a CAGR of 5.5% from 2026 to 2032.

A magnetic detacher is a device used in retail settings to remove anti-theft security tags, commonly known as Electronic Article Surveillance (EAS) tags, from merchandise after it has been purchased. These tags are typically placed on products to prevent shoplifting by triggering alarms when they pass through the EAS detection systems at store exits.

In 2025, global Magnetic Detacher production reached approximately 4,375 K units, with an average global market price of around US\$ 32 per unit.

The upstream of the Magnetic Detacher supply chain mainly includes suppliers of core materials (rare earth elements, neodymium-iron-boron permanent magnets, aluminum alloys, steel, and high-strength plastic composites) and key components (copper wire coils, control units for electronic models). The midstream consists of manufacturers engaged in product design, magnetic circuit arrangement, modular assembly, surface treatment (electroplating, spray coating), and performance testing (magnetic force verification). The downstream connects to EAS (Electronic Article Surveillance) system integrators, distributors, and end users such as supermarkets, clothing stores, convenience stores, and unmanned retail outlets, with after-sales services linking the entire chain to meet both new equipment deployment and replacement needs for anti-theft tag unlocking.

The cost structure of Magnetic Detachers is dominated by procurement costs of core materials, especially neodymium-iron-boron permanent magnets whose prices are affected by rare earth market fluctuations. Subsequent costs include production and

processing fees (magnetic circuit optimization, assembly, surface treatment, and magnetic force testing), R&D investment (adaptive design for compatible EAS tag systems, intelligent function development for electronic models), as well as logistics, sales, and management costs.
