The global Magnetic Door Latches market size is predicted to grow from US\$ 828 million in 2025 to US\$ 1101 million in 2032; it is expected to grow at a CAGR of 4.3% from 2026 to 2032.

Magnetic door latches use magnets to hold doors, cabinets, or cupboards shut quietly and smoothly, replacing traditional mechanical bolts with a simple magnet-and-striker-plate system for convenient, low-maintenance closure, ideal for interior doors, closets, and furniture where locking isn't required but a secure hold is desired.

Global production of magnetic door latches is projected to reach 212 million units by 2025, with an average price of \$4 per unit. Gross margins typically range from 25% to 45%.

The upstream of the magnetic door latch industry chain mainly includes permanent magnet materials such as neodymium iron boron and ferrite, steel and stainless steel, plastic parts, and surface treatment materials. The price of upstream raw materials and the stability of magnetic properties directly affect the product's attraction strength and lifespan. The downstream is a key link with concentrated demand, with applications widely distributed in residential furniture, cabinets and wardrobes, office furniture, commercial display cases, and interiors for RVs and ships. The home decoration and furniture market is the largest downstream sector, emphasizing quiet operation, concealed installation, and long-term reliability, typically purchased as part of complete furniture sets or customized cabinetry. Engineering and commercial projects focus more on consistency and batch delivery capabilities. The repair and DIY retail market is mainly driven by e-commerce and hardware channels, with fragmented but stable demand. Downstream users are highly price-sensitive but have basic requirements for

quality stability and aesthetic details.

Industry development trends are mainly focused on miniaturization, concealment, and high durability. Product design emphasizes aesthetic integration and tool-free installation, while environmentally friendly coatings and corrosion resistance are becoming important selling points. Driving factors include real estate renovation demand, the increasing penetration rate of customized furniture, and the growth of RVs and modular furniture. The main obstacles are fluctuations in the real estate cycle, competition from similar mechanical door latches, and cost pressures from fluctuations in magnetic material prices.
