A magnetic LED light is a lighting device that combines light - emitting diodes (LEDs) with a magnetic feature. It utilizes the properties of magnets, usually incorporated in its base or body, to attach to ferrous surfaces. This allows for convenient hands - free operation and flexible positioning. The LED technology provides energy - efficient and often bright illumination, with various light intensities and color temperatures available. These lights are used in a multitude of applications such as automotive repair (attaching to the vehicle chassis), workshop tasks (clinging to metal workbenches), and even in some household scenarios (like sticking to a refrigerator for additional light in a kitchen corner) where a portable, attachable light source is beneficial.

United States market for Magnetic LED Light is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
