The global Magnetic Porous Carbon Materials market size is predicted to grow from US\$ 8.80 million in 2025 to US\$ 29.90 million in 2032; it is expected to grow at a CAGR of 19.2% from 2026 to 2032.

In 2025, global sales volume of Magnetic Porous Carbon Materials is estimated at approximately 120 tons, with an average global market price of about USD 75/kg. The gross margin of major producers is estimated to be around 35%-55%.

Magnetic Porous Carbon Materials refer to functional composite materials formed by introducing magnetic components such as iron, nickel, cobalt and their oxides into a porous carbon framework. They are not a single chemical product and are commonly supplied in forms such as powder, granule and fiber. These materials combine the high specific surface area, tunable pore structure and strong adsorption capacity of porous carbon with the magnetic response and convenient recovery enabled by magnetic components.

The upstream materials of Magnetic Porous Carbon Materials mainly include coal-based carbon sources, biomass, resin precursors, carbon nanomaterials, iron salts, nickel salts, cobalt salts, activators and additives. Midstream production involves material companies preparing products with different pore structures and magnetic strengths through carbonization, activation, loading, co-precipitation, hydrothermal compositing and related processes. Downstream applications mainly include environmental water treatment, soil remediation, solid waste remediation, energy storage and functional materials, with environmental adsorption and magnetic separation recovery being the most important application directions at present.

United States market for Magnetic Porous Carbon Materials is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Magnetic Porous Carbon Materials is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.

Europe market for Magnetic Porous Carbon Materials is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
