The global Magnetic Refrigerator Door Sealant market size is predicted to grow from US\$ 4037 million in 2025 to US\$ 6031 million in 2032; it is expected to grow at a CAGR of 6.0% from 2026 to 2032.

The magnetic sealant strip for refrigerator doors is a magnetic elastic sealant material installed around the refrigerator door, usually made of rubber or plastic. Its main function is to ensure that the refrigerator door can fit tightly to the refrigerator body when closed, preventing cold air from leaking out, thereby improving the energy efficiency of the refrigerator. Through magnetic adsorption, the sealant can automatically suck the door tightly, ensuring good airtightness, maintaining a low temperature environment in the refrigerator and saving energy. This sealant is commonly used in refrigeration equipment such as household and commercial refrigerators and freezers.

In the future development trend, the magnetic sealing strips for refrigerator doors will evolve towards environmentally friendly materials and intelligent functions to improve the energy efficiency and user experience of refrigerators. As consumers demand energy-saving products, more manufacturers will develop more durable, recyclable or degradable materials. In addition, the introduction of smart sealing strip technology (such as temperature sensing and automatic adjustment of sealing) will further optimize the refrigeration effect of refrigerators. According to the shape classification, magnetic sealing strips can be divided into dart-shaped (push-in type) and wing profile, lip profile. In terms of market size, with the continued growth of the global home appliance industry, the market for magnetic sealing strips for refrigerator doors is also expanding. In 2023, the market size of magnetic sealing strips for refrigerator doors was US\$3.7 billion, and the market is expected to maintain steady growth in the next few years, especially in the Asia-Pacific region, due to rapid urbanization and increasing demand

from middle-class families, which has driven refrigerator sales, thereby driving the demand for sealing strips. According to relevant market research, the annual sales of refrigerators and their components will rise steadily, further promoting the development of this field.
