The magnetic ring cross-flow fan blade is a special type of fan blade, and its design is inspired by the shape of the magnetic ring. It consists of a series of fan blades arranged in a ring to form a closed ring structure. Magnetic ring cross-flow fan blades are usually made of metal or plastic materials and have high strength and durability. The working principle of the magnetic ring cross-flow fan blade is to generate airflow through the rotation of the fan blade, thereby achieving the effects of heat dissipation, ventilation and air circulation. Its design allows the blades to generate forward and backward airflow at the same time when rotating, forming a cross-flow effect. This design improves fan efficiency and air volume while reducing noise and energy consumption.
