While we enjoy the magnificent pink flowers of the magnolia tree in spring, traditional Chinese medicine has been relying on the healing properties of ornamental plants for centuries. The reason for this lies in the two main components Magnolol and Honokiol, which have both antibacterial and antioxidant effects. The valuable ingredients are extracted from the tree bark and can therefore be used not only for medical but also for cosmetic purposes. Magnolia bark extract has a very positive effect on your skin, which is why it is used to care for particularly sensitive skin.
