Mahjong is a traditional Chinese tile-based game that originated in the 19th century. It is typically played by four players, although variations also allow for three-player or two-player modes. The objective is to create sets of tiles, either by matching three of a kind or in numerical sequences. The game involves strategy, calculation, and a certain level of skill. Players take turns drawing and discarding tiles until they form a winning hand according to the specific rules of the version being played. Mahjong has gained popularity worldwide and is often enjoyed socially or competitively as a challenging and engaging pastime.

In recent years, the Mahjong Game industry has witnessed significant growth and diversification. As the game has become increasingly popular globally, it has transitioned from a traditional tabletop game to various digital platforms. Mobile apps, online multiplayer versions, and virtual reality experiences have emerged, allowing players to enjoy Mahjong on different devices and connect with opponents from around the world. The industry has also seen the introduction of innovative variations, such as themed Mahjong games featuring characters from popular franchises or incorporating unique gameplay mechanics.
