The global Make-Up Air Systems market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of %from 2025 to 2031.

Make-up air is designed to “make up” the air in your interior space that has been removed due to process exhaust fans. This type of HVAC solution pulls in fresh, tempered air from outside your building to replace existing air that cannot be recirculated.

There is a growing emphasis on sustainability and green building practices in the construction industry. Buildings are being designed and constructed to be energy-efficient, environmentally friendly, and to minimize carbon footprint. This trend is driven by environmental concerns, government regulations, and the desire to reduce operating costs through energy savings. The adoption of digital technologies and Building Information Modeling (BIM) is transforming the way buildings are designed, constructed, and managed. BIM enables better collaboration, improved project coordination, and enhanced visualization, resulting in increased efficiency and reduced costs. The integration of technologies such as Internet of Things (IoT), artificial intelligence (AI), and data analytics is further driving the digitization of the building industry. There is a growing focus on creating buildings that promote occupant wellness and well-being. Biophilic design principles are being incorporated, which emphasize connections with nature, natural light, green spaces, and indoor air quality. This trend is driven by increasing awareness of the impact of the indoor environment on people's health, productivity, and overall satisfaction. Climate change and the increased frequency of extreme weather events have heightened the need for resilient and disaster-resistant construction practices. Building codes and regulations are evolving to ensure that buildings can withstand seismic activity, hurricanes, floods, and other natural disasters.

This trend includes the use of resilient materials, better insulation, reinforced structures, and strategic location planning.
