Abstracts

The report requires updating with new data and is sent in 48 hours after order is placed.

Managed VPN services enable users to manage and monitor their organization's network, and provide a complete view of the network. Service providers help enterprises manage the end points of the network, and notify users whenever a threat is detected. Moreover, enterprises can access a portal where all the activities of the network, such as performance reporting, network health monitoring, service management, and SLA management are reported, which makes management of the network easier.

Furthermore, managed services help organizations in the optimum utilization of all the resources, which increases the efficiency of the organization.

North America is the largest region of Managed VPN in the world in the past few years and it will keep increasing in the next few years. North America market took up about 37% the global market in 2018, while Europe and China were about 30%, 3.4%.

According to this study, over the next five years the Managed VPN market will register a 15.0% CAGR in terms of revenue, the global market size will reach US\$ 22200 million by 2024, from US\$ 11000 million in 2019.
