The global Mango Kernel Oil market size is predicted to grow from US$ 322 million in 2025 to US$ 458 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

Mango Kernel Oil—also known as mango seed oil—is a natural vegetable oil extracted from the kernels (seeds) of the mango fruit (Mangifera indica). After removing the fleshy part of the mango, the seed inside contains a hard kernel rich in lipids, typically 8–13% oil content, which can be extracted through cold pressing, expeller pressing, or solvent extraction. Mango kernel oil is valued for its cosmetic, pharmaceutical, nutraceutical, and food applications due to its rich fatty-acid profile, moisturizing properties, and oxidative stability.

In 2024, global Mango Kernel Oil sales volume reached approximately 34 k tons, with an average global market price of around 9200 US$ per ton.

Mango Kernel Oil is a natural vegetable oil extracted from the seeds (kernels) of the Mangifera indica fruit and is valued for its high content of oleic, stearic, and palmitic acids, giving it moisturizing, emollient, and oxidative-stability properties used in cosmetics, foods, and industrial formulations. The industry chain begins upstream with mango cultivation, fruit processing, and seed collection—where mango seeds are obtained as by-products from juice, pulp, and dried-mango factories—followed by kernel separation, drying, mechanical or solvent extraction, and refining steps that produce crude or refined mango kernel oil and mango butter. Midstream participants include oil refiners, cosmetic-ingredient producers, specialty fat manufacturers, and bulk oil processors who convert the raw oil into cosmetic-grade, food-grade, or industrial-grade materials. Downstream segments include personal-care and cosmetics manufacturers (creams, lotions, lip balms, hair conditioners, soaps), food processors using mango kernel oil as a cocoa butter substitute in confectionery, nutraceutical companies, and

industries producing surfactants, candles, and biolubricants. The industry average gross margin for mango kernel oil is generally high, ranging from 25% to 45%, driven by the low cost of raw material (agricultural waste) and strong value addition through refining, certification (organic, cosmetic-grade), and integration into premium skincare products. Margins tend to be highest in cosmetic-grade and organic-certified oils, moderate in food-grade fats, and lower in industrial-grade applications. Overall, the mango kernel oil industry benefits from sustainability trends, circular-economy sourcing, and growing demand for natural, plant-based, high-value oils.

United States market for Mango Kernel Oil is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.

China market for Mango Kernel Oil is estimated to increase from US$ million in 2025 to US$ million by 2032, at a CAGR of % from 2026 through 2032.
