A manhole inspection tool is a specialized device used to inspect and assess the condition of manholes, which are access points to underground utility systems such as sewers, storm drains, and electrical conduits. These tools typically include a camera or video system mounted on a telescoping pole or robotic crawler that can be lowered into the manhole to capture images and video footage of the interior. This allows inspectors to identify any damage, blockages, or other issues that may require maintenance or repair. Manhole inspection tools are essential for ensuring the safety and functionality of underground infrastructure.
