Annual production capacity is 20 K units. Gross Profit Margin: 39%. Manipulator-Integrated Robotic Systems are robotic platforms?typically mobile (UGV, UAV, or fixed base)?that combine a robotic manipulator arm with sensing, control, and mobility systems to physically interact with objects in the environment. The manipulator-integrated robotic systems industry chain includes upstream suppliers of sensors, actuators, controllers, and AI software; midstream integrators that combine robotic arms with mobile platforms to build complete systems; and downstream users in defense, law enforcement, and industrial sectors deploying them for EOD, hazardous handling, inspection, and remote manipulation tasks. The field is shifting from basic remote-controlled arms to intelligent systems that combine mobility, perception, and manipulation, gradually reducing human involvement in dangerous environments while increasing autonomy and precision.
