The global Manned Atmospheric Diving System (ADS) market size is predicted to grow from US\$ million in 2025 to US\$ million in 2032; it is expected to grow at a CAGR of % from 2026 to 2032.

A manned atmospheric diving system (ADS) is a special piece of equipment used for deep-sea diving, designed to allow divers to work in high-pressure environments without being affected by underwater pressure. Unlike traditional diving methods, ADS keeps the internal air pressure the same as the surface air pressure, allowing divers to move and work freely in deeper waters without having to wear complicated diving suits or use compressed air.
