A Manual Height Adjustable Desk is a type of ergonomic office furniture designed to accommodate varying preferences and promote a healthier workspace by allowing users to easily adjust the height of the desk according to their comfort level. Unlike traditional fixed-height desks, a manual height adjustable desk typically features a hand-operated crank or lever mechanism that enables users to raise or lower the desk's surface to the desired height. This flexibility caters to individuals who prefer the option of working while sitting or standing, promoting better posture, reducing the risk of musculoskeletal issues, and enhancing overall comfort during extended periods of work. The manual adjustment mechanism offers simplicity and cost-effectiveness compared to motorized counterparts, providing users with the freedom to customize their workspace to meet ergonomic and health requirements.
