The global Manually-Operated Rotating Brush Sweeper market size is predicted to grow from US\$ 1446 million in 2025 to US\$ 1925 million in 2032; it is expected to grow at a CAGR of 4.3% from 2026 to 2032.

Manually-operated rotating brush sweeper is a wheeled machine designed to remove debris, coarse dirt and dust from the floor. Through the action of a rotating brush (one, or more than one), or through the combination of brush(es) + vacuum cleaner, a sweeper removes dry dirt from the ground, collecting it in an on-board waste container.

Hygiene and cleanliness are considered key attributes in all industrial and commercial sectors, from food and beverage to hospitality and manufacturing. Maintaining cleanliness reportedly improves employee productivity and well-being. It also eliminates the risk of contamination, ensuring consumer safety. Additionally, cleanliness can leave a lasting impression on consumers in retail, hospitality and offices, with the hospitality industry being one of the fastest growing industries in the world. The growth in travel and tourism has primarily driven the growth of the global hospitality industry. In the hospitality industry, cleanliness is critical to customer satisfaction and retention. Growth in the hospitality industry and rising demand for cleaning and hygiene maintenance are the major driving forces for the global sweeper market. One of the most important and emerging trends in cleaning equipment is the provision of environmentally sustainable products and services. Green cleaning mainly refers to the use of products and services that have less impact on human health and the environment, rather than other products and services that cause harm to human health and the environment. Green cleaning technology focuses on reducing water and chemicals, reducing emissions and air pollution, and using machines that last longer. Providing the most cost-effective sustainable cleaning is also competitive. Industrial cleaning equipment manufacturers

continue to develop technologies to meet various industrial needs, creating many opportunities for industry players.
