Marine board is a durable, waterproof, and weather-resistant building material typically made from high-density polyethylene (HDPE) plastic. It is commonly used in marine and outdoor applications due to its ability to withstand harsh environmental conditions such as saltwater, UV exposure, and moisture. Marine board is often used as a substitute for wood in marine construction projects, including boat components like seats, hatches, and trim, as well as in dock and pier construction. It is valued for its resistance to rot, mold, and mildew, as well as its low maintenance requirements. Additionally, marine board is lightweight, buoyant, and easy to work with using standard woodworking tools.
