Marine chains are a wide range of studlink chain and studless chain?including anchor chain?mooring chain?windlass chain?trawlex chain?deck lashing chain?dock fender chain, trawl door chain, sweep chain, etc. Marine chains are made in a number of different material and strength grades to suit specific requirements, for example ships equipment and buoy moorings to higher grades needed for heavy duty offshore operations.

Marine chains manufacturers should manufacture chains according to internationally agreed standards, with product integrity verified by all the major class societies, and either painting or galvanised finish as required

The marine chain market is witnessing a positive trend driven by several factors such as the expansion of the maritime industry, increasing offshore exploration and production activities, and growing demand for secure mooring systems. Marine chains are essential components for various offshore applications, including anchoring, towing, and mooring of vessels and structures. As the global shipping industry continues to grow, driven by international trade and the need for efficient transport, the demand for marine chains is expected to rise. Moreover, the development of offshore wind farms and oil and gas exploration in deepwater regions has created a significant demand for marine chains that can withstand harsh environments and support heavy loads. Additionally, advancements in chain manufacturing technologies, such as the use of high-strength

materials and improved coatings for corrosion resistance, are further contributing to the market growth. Overall, the marine chain market is anticipated to continue its upward trajectory in the foreseeable future.
