Marine Electronic Fuel Injection System is one of the most important parts of a marine diesel engine. A fuel injection system does the work of providing the right amount of fuel to the engine cylinder at the right moment. It is also extremely important that the fuel injected inside the engine enters the cylinder at the right combustion situation for the highest combustion efficiency. It is for this reason that there is a need of a measured fuel supply system which times and monitors the delivery of the fuel and oil in the combustion chamber. This timing device helps to have a perfect atomization of the fuel.
