Marine Intercom System is a specialized, robust communication network installed on a vessel to enable clear and reliable voice communication between key locations, especially in areas with high ambient noise. Unlike standard telephones, these systems are designed to function in the harsh marine environment, resisting water, salt spray, vibration, and extreme temperatures.

The primary purpose is to enhance operational efficiency, coordination, and, most critically, safety by ensuring instant communication between the bridge, engine control room, deck, bow thruster rooms, mooring stations, and other vital points.

The average gross profit margin in this industry is around 50%.
