The global Marine Medium Voltage Auxiliary Switchboard market size is predicted to grow from US\$ 83.93 million in 2025 to US\$ 120 million in 2032; it is expected to grow at a CAGR of 5.4% from 2026 to 2032.

In 2025, global production of marine medium voltage auxiliary switchboards reached 650 units, with an average selling price of US\$132,000 per unit. Marine medium voltage auxiliary switchboards are auxiliary power distribution, control, and protection devices in the medium voltage power systems of ships or offshore platforms. They typically operate at medium voltage levels such as 3.3kV, 6.6kV, and 11kV, and are mainly used to receive electrical energy from the main switchboard or medium voltage busbar and supply power to medium-to-high power auxiliary loads such as auxiliary transformers, thrusters, large pump sets, compressors, air conditioning chillers, cargo oil pumps, ballast pumps, drilling auxiliary equipment, and offshore platform auxiliary machinery. The difference between this and 'marine medium-voltage main switchboard' lies in the following: the main switchboard focuses more on main generator grid connection, main busbar segmentation, and overall shipboard main power distribution; the auxiliary switchboard focuses more on secondary medium-voltage distribution for high-power auxiliary equipment, regional loads, and transformer feeders, and is mainly used in large container ships, LNG carriers, tankers, cruise ships, ro-ro passenger ships, large passenger ships, and offshore platforms. Upstream components include copper busbars, circuit breakers, protective relays, instrument transformers, insulation components, cabinet materials, and control and communication modules; downstream customers include shipyards, ship owners, offshore platforms, port shore power projects, electric propulsion system integrators, and naval vessel projects. The gross profit margin is approximately 25%-45%.

United States market for Marine Medium Voltage Auxiliary Switchboard is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
