The global Marine Modular Prefabricated Cabin market size is predicted to grow from US\$ 142 million in 2025 to US\$ 264 million in 2032; it is expected to grow at a CAGR of 9.4% from 2026 to 2032.

In 2025, global production of marine modular prefabricated cabins reached 15,710 units, with an average selling price of \$9,260 per unit. A marine modular prefabricated cabin refers to a cabin unit in which bulkheads, ceilings, doors, furniture, sanitary units, and certain mechanical, electrical, and decorative elements are integrated within a factory setting, and which is subsequently transported in a modular form to a shipyard for installation. Application scenarios include passenger cabin areas and crew living quarters on cruise ships and large passenger vessels, accommodation areas on Ro-Pax vessels and ferries, and offshore drilling platforms. The upstream segment primarily comprises marine fireproof panels/bulkhead systems, steel/aluminum structural components, doors and windows, furniture, sanitary modules, piping, electrical systems, HVAC terminal units, coatings, and acoustic/thermal insulation materials. The midstream segment encompasses modular design, factory prefabrication, final assembly, and logistics/hoisting operations. The downstream market targets projects involving cruise lines, ferry operators, offshore EPC contractors, and vessel owners undertaking refitting work. Gross margins typically range from approximately 10% to 30%.
