Marine penetrators are a necessity and find various applications in a vessel such as signal transmission. Marine penetrators are used in underwater as well as surface water ships/marines for the connectivity of different components. They are water proof, rust proof and flexible.

The global maritime ship size has shown a steady growth trend in recent years. According to the United Nations Conference on Trade and Development (UNCTAD) released the '2022 Global Maritime Transportation Development Review Report', in 2021, the ship capacity totaled 2.135 billion dwt. At the beginning of 2022, the size of the global commercial shipping fleet compared to the same period in 2021 increased by 2.9%, which initially estimated that the global ship capacity in 2022 was about 2.2 billion dwt. 2022, affected by the Russia-Ukraine conflict, repeated epidemics, rising inflationary pressure and other factors, the international dry bulk transport market demand for maritime transport is generally weak. conflict, repeated epidemics, rising inflationary pressure and other factors, the international dry bulk transportation market maritime demand is generally weak. By the end of 2022, the global dry bulk cargo ship capacity of 972 million deadweight tons, an increase of 2.8% compared with 2021; due to the improvement of congestion in overseas ports, and the growth rate of demand is lower than the growth rate of capacity, there is an overall overcapacity of dry bulk cargo, and the freight price declined sharply.
