According to our LPI (LP Information) latest study, the global Marker Pens market size was valued at US\$ 1701.7 million in 2023. With growing demand in downstream market, the Marker Pens is forecast to a readjusted size of US\$ 1964.7 million by 2030 with a CAGR of 2.1% during review period.

The research report highlights the growth potential of the global Marker Pens market. Marker Pens are expected to show stable growth in the future market. However, product differentiation, reducing costs, and supply chain optimization remain crucial for the widespread adoption of Marker Pens. Market players need to invest in research and development, forge strategic partnerships, and align their offerings with evolving consumer preferences to capitalize on the immense opportunities presented by the Marker Pens market.

Marker pen also known as marker. It is a special color pen for writing or painting. It contains ink and usually has a lid. Marker production area is more obvious. The regional consumer market is less obvious, and the demand for office stationery is relatively high in economically developed areas. In 2018, China's light industry overcame adverse factors such as rising costs and the trade war between China and the United States, and worked hard to improve the quality of its development by taking consumption upgrading as its orientation. In 2018, China's production capacity reached 8.5 billion markers, and the output was 7.1 billion. It is expected that by 2025, the national output will reach 9.8 billion markers, with a CAGR compound growth rate of 5%. Currently, in terms of volume, oil-based marker pens account for the majority of the market, about 56% (2018), and this proportion is expected to drop to 47% by 2025. After the popularity of alcoholic markers for a while, it is estimated that in a few years, the water-based marker market began to explode, because there are still too few water-based markers in

China, and water-based markers still have many unique features in environmental protection and color use, which are beyond the reach of alcoholic markers. From the perspective of application, the most widely used marker is design/office, and its production share is as high as 59% (in 2018). It is expected that this field will remain the most widely used marker in the next six years, and its market share is expected to reach 59% by 2025.

In China, Marker Pens key players include SAKURA COLOR, Guangdong Baoke Stationery Co.,Ltd., Zhaoqing Sita Stationary Commodity Co.,Ltd., etc.
