The global Maternity Dresses & Nursing Dresses market size is predicted to grow from US\$ million in 2025 to US\$ million in 2031; it is expected to grow at a CAGR of % from 2025 to 2031.

Maternity clothing is worn by women as an adaptation to changes in body size during pregnancy. The evolution of maternity clothing began during the Middle Ages, and became fashionable as women became more selective about style and comfort in the types of maternity clothing they wore. Fashions were constantly changing over time, such as the high-waisted Empire silhouette style maternity dress that was fashionable at the turn of the 19th century, and the 'wrapper' style dress of the Victorian era that a woman could simply wrap around herself and button up.

The commercial production of maternity clothing began at the start of the 20th century, and continued to evolve. During the 1990s in the U.S., relaxed laws such as the Family and Medical Leave Act, which was signed into law by President Bill Clinton, helped to protect the jobs of pregnant women, and served as a form of liberation that afforded women the freedom to wear fashionable maternity styles that emphasised their pregnancy.
