The global Maternity Multivitamins market size is predicted to grow from US\$ 509 million in 2025 to US\$ 852 million in 2032; it is expected to grow at a CAGR of 7.8% from 2026 to 2032.

Growing Emphasis on Prenatal Health: There is increasing awareness and emphasis on prenatal health and nutrition, driving demand for maternity multivitamins among expecting mothers. Healthcare professionals, including obstetricians and gynecologists, often recommend prenatal vitamins containing essential nutrients such as folic acid, iron, calcium, vitamin D, and omega-3 fatty acids to support fetal development and maternal well-being during pregnancy.

Expansion of the Maternal Supplements Market: The maternal supplements market is expanding beyond traditional prenatal vitamins to include a wider range of products tailored to the specific needs of pregnant and breastfeeding women. This includes specialized formulations targeting common pregnancy-related symptoms such as nausea, fatigue, and constipation, as well as supplements designed to support postpartum recovery and lactation.

Preference for Natural and Organic Ingredients: Expecting mothers are increasingly seeking maternity multivitamins made from natural and organic ingredients, free from artificial additives, preservatives, and allergens. Manufacturers are responding to this demand by formulating prenatal supplements with plant-based ingredients, organic sources of vitamins and minerals, and non-GMO (genetically modified organism) certifications to appeal to health-conscious consumers.
