The global MCT Infrared Preamplifier Detector market size is predicted to grow from US\$ 122 million in 2025 to US\$ 175 million in 2032; it is expected to grow at a CAGR of 5.3% from 2026 to 2032.

In 2025, global production of MCT infrared preamplifier detectors reached 25,360 units, with an average selling price of US\$4,912 per unit. MCT infrared amplification detectors are a type of infrared detection component that integrates a mercury cadmium telluride (MCT) photon detector with a low-noise preamplifier circuit in the same package or module. It combines the wide-band, high-sensitivity detection capability of mercury cadmium telluride material with the instant amplification capability of a preamplifier for weak signals. It is used to amplify and impedance match the weak current/charge output of the detector at the source end, which significantly improves the signal-to-noise ratio, anti-interference capability and available bandwidth of the system. It is especially suitable for long cable, weak signal and high-speed measurement scenarios, and is applied in the fields of national defense and security, aerospace and scientific research. The upstream of the industry chain includes high-purity Hg/Cd/Te raw materials and substrates (Cd, Zn, Te, etc.), MCT epitaxial growth (MBE/LPE, etc.) and device processes, low-noise operational amplifiers/precision resistors and capacitors and power management, TEC/temperature control and (more advanced) micro-crystals, infrared window/lens materials (such as ZnSe, etc.) and packaging materials; the midstream includes detector manufacturing, packaging, debugging, calibration and reliability testing; the downstream connects with instrument manufacturers (spectroscopy/metrology/gas analysis), system integrators, research and aerospace institutions and high-end industrial customers. Gross profit margin is approximately 25%–50%.

United States market for MCT Infrared Preamplifier Detector is estimated to increase from US\$ million in 2025 to US\$ million by 2032, at a CAGR of % from 2026 through 2032.
