Mechanical Covered Yarn (MCY) is a type of composite yarn created by wrapping or covering an elastic core yarn, such as spandex or elastane, with a non-elastic yarn, like nylon, polyester, or cotton. This covering process is done through mechanical twisting, where the core yarn is wrapped by the outer fibers without the use of adhesive or heat. The result is a yarn with enhanced elasticity, durability, and a smoother appearance, making it popular in applications requiring stretch, comfort, and resilience.
