The global Medical Cast Saw Device market size is predicted to grow from US\$ 607 million in 2025 to US\$ 887 million in 2032; it is expected to grow at a CAGR of 5.6% from 2026 to 2032.

In 2025, global production of medical cast saw devices reached approximately 77.5 thousand units, with an average market price of around US\$ 8,000 per unit. Gross profit margins across the industry generally ranged from 35% to 55%, reflecting the combination of specialized design, safety requirements, and medical-grade manufacturing standards. Global production capacity in 2025 was estimated at about 103.3 thousand units, indicating adequate supply capability to support hospital and clinic demand.

Medical cast saw devices are powered surgical tools designed to safely cut and remove orthopedic casts made of plaster or fiberglass. They operate using oscillating blade motion that minimizes the risk of skin injury while allowing efficient cast removal. These devices are widely used in hospitals, orthopedic clinics, and emergency care settings.

The industrial chain includes upstream electric motors, oscillating mechanisms, blades, housings, batteries, and electronic control components. The midstream focuses on device assembly, safety testing, sterilization compatibility design, and quality inspection. Downstream applications mainly involve hospitals, orthopedic departments, outpatient clinics, and rehabilitation centers.

The medical cast saw device market is developing steadily as orthopedic treatment volumes continue to grow worldwide. Increasing incidence of fractures, sports injuries, and aging populations is driving sustained demand for efficient and safe cast removal

tools. Hospitals and clinics are placing greater emphasis on device reliability, noise reduction, portability, and patient comfort. Technological advancements in motor efficiency, battery systems, and blade design are improving performance while reducing operational risk. During 2026-2032, supported by expanding healthcare infrastructure and rising standards of orthopedic care, the medical cast saw device market is expected to maintain stable growth with gradual improvement in product value and usability.
