The global Medical Grade AIO Panel PC market size is predicted to grow from US\$ 338 million in 2025 to US\$ 475 million in 2032; it is expected to grow at a CAGR of 5.1% from 2026 to 2032.

The development trend of medical-grade AIO panel PCs in the healthcare industry is expected to be driven by several factors. Medical professionals are increasingly looking for integrated solutions that combine multiple functions in a single device. AIO panel PCs offer a compact and space-saving design that integrates a computer, display, and touch interface, making them ideal for medical applications where space is limited. The healthcare industry is moving towards digitization, with the adoption of EHRs becoming more widespread. AIO panel PCs can be used as dedicated EHR terminals, allowing healthcare providers to access and update patient records conveniently and securely. Infection control is a critical concern in healthcare settings. Medical-grade AIO panel PCs are designed to meet stringent hygiene standards, with features such as antimicrobial coatings and sealed front panels that can be easily cleaned and disinfected. The demand for such devices is expected to increase as healthcare facilities prioritize infection control measures.
